1. Applicant's election without traverse of group 3, figures 4-7 in the reply filed on 8/17/2005 is acknowledged.
2. Claim 17 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/17/2005.
3. Figure 17 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
5. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Santi. Santi discloses a vacuum valve including first and second main ports 6 and 13 which ports are connected to a vacuum pump and a vacuum chamber as disclosed on col. 3, lines 28-30, an annular valve seat 8, a circular flow path wall 7, a disc shaped valve member 9 with a front face having a first sealing member 10, a circular outer

peripheral wall that is parallel to the valve body wall 7 and immediately below the numeral 8 and above the numeral 15 in figure 5, which peripheral wall has a diameter smaller than 7 but greater than the seat diameter defined by 6 as claimed and thereby forming a restricted flow path as claimed.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Maltby, Kajitani/229 and Kajitani/462 tech other vacuum valves with disc shaped bodies.

7. Claims 2 and 4-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
